EDUCATION

Hilcoe School of Computer Science and Technology – BSc in Software Engineering

Addis Ababa, Ethiopia

GPA: 3.88

Expected June 2027

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Web Development, Software Engineering Principles

TECHNICAL SKILLS

- **Proficient:** Java, C#, HTML/CSS, JavaScript, Object-Oriented Programming (OOP), GUI Development, Supabase, Git/GitHub, SQL
- **Familiar:** Next.js, React, Node.js, Express.js, MongoDB, PostgreSQL, MySQL, C++, Database Design, Telegram Bot Integration, REST APIs
- **Tools & Technologies:** Visual Studio, VS Code, Git, Supabase, Firebase, Postman, Linux Basics

PERSONAL PROJECTS

Mela Solutions – Student Job & Opportunity Platform

2025 – Present

(Next.js, JavaScript, Supabase, Telegram Bot API)

- Built a full-stack talent acquisition platform to help students discover entry-level jobs, internships, and corporate opportunities.
- Implemented secure user authentication, dynamic job listings, and smart search filters using Supabase backend functions.
- Integrated Telegram Bot API features to allow users to receive real-time opportunity updates and interact with the platform seamlessly.
- Designed a responsive frontend interface focused on usability, accessibility, and a modern, clean user experience.

Adis Tesfa Mental Health Platform

In Development

(Node.js, Express.js, Postgresql, Next.js)

- Developing a mental health support platform focused on improving access to wellness resources and anonymous digital storytelling.
- Implementing a secure user authentication system and an intuitive appointment booking/scheduling workflow.
- Structuring a dedicated mental health resources library and a personalized user/admin dashboard layout.

Haymanote Multi-Faith Platform

In Development

(JavaScript, Node.js, Express.js, Postgresql)

- Building a community and marketplace platform designed to support multi-faith communities with discussions, events, and services.
- Developing role-based access control for verified leadership roles, a community discussion forum, and an event management module.
- Integrating an e-commerce marketplace module and planning AI-assisted features for natural content moderation.

Academic Software Engineering Projects

Academic Term

(Java, OOP, GUI, Database Concepts)

- Built an Airline Reservation System and a Clinic Booking System featuring structured data handling and CRUD operations.
- Applied strict object-oriented design principles (OOP) including abstraction, polymorphism, encapsulation, and modular structure.
- Designed interactive desktop GUIs integrated cleanly with database-driven backend workflows.

ACTIVITIES & LEADERSHIP

ALX Data Science Program – Participant

2025 – Present

- Collaborated with cross-functional teams on complex data analysis and applied data science problem-solving projects.
- Participated in peer code reviews and team discussions regarding modeling approaches and interpretation.

Hack Into Bright Ethiopia Hackathon – Participant

2024

- Collaborated within a competitive team to design and prototype a tech solution addressing real-world community challenges..
- Developed frontend/backend features and successfully presented the final MVP concept to a panel of expert judges.
